REVIEW GATES BIND RELEASES TO REVIEWED EVIDENCE.

Transformer procurement review with Apertus.

Apertus: Proposes source-linked claims.

Review gates: Bind approvals to the package revision.

PACKAGE SCOPE SELECTS THREE 750 KVA TRANSFORMERS.

GUAM POWER AUTHORITY / OP34276 / ITEM 2

3 × 750 kVA

13.8 kV primary
120/208 V secondary

The scope excludes the separate 300 kVA item 1.

Original	Pages
Full tender	57
E-004 specification	20
Bid abstract	5
Amendments / issuance	4
Purchase order	9

95 attachment pages include overlapping material.

EVIDENCE WORKSPACES CONNECT SOURCE INSPECTION WITH REVISION REVIEW.

Snapshot checks

Z3 + commercial rules

BM25 search: Ranks retained source passages without claiming confidence.

Snapshot diff: Exposes changed fields and affected source references.

Lineage: Links documents, claims, corrections, and recorded runs.

Draft dossier: Exports snapshot-bound review records without granting approval.

PRICE CORRECTIONS PRESERVE THE ORIGINAL MODEL OUTPUT.

MODEL PROPOSAL / THREE-UNIT TOTAL

$111,316.50

The model used the unit-price field.

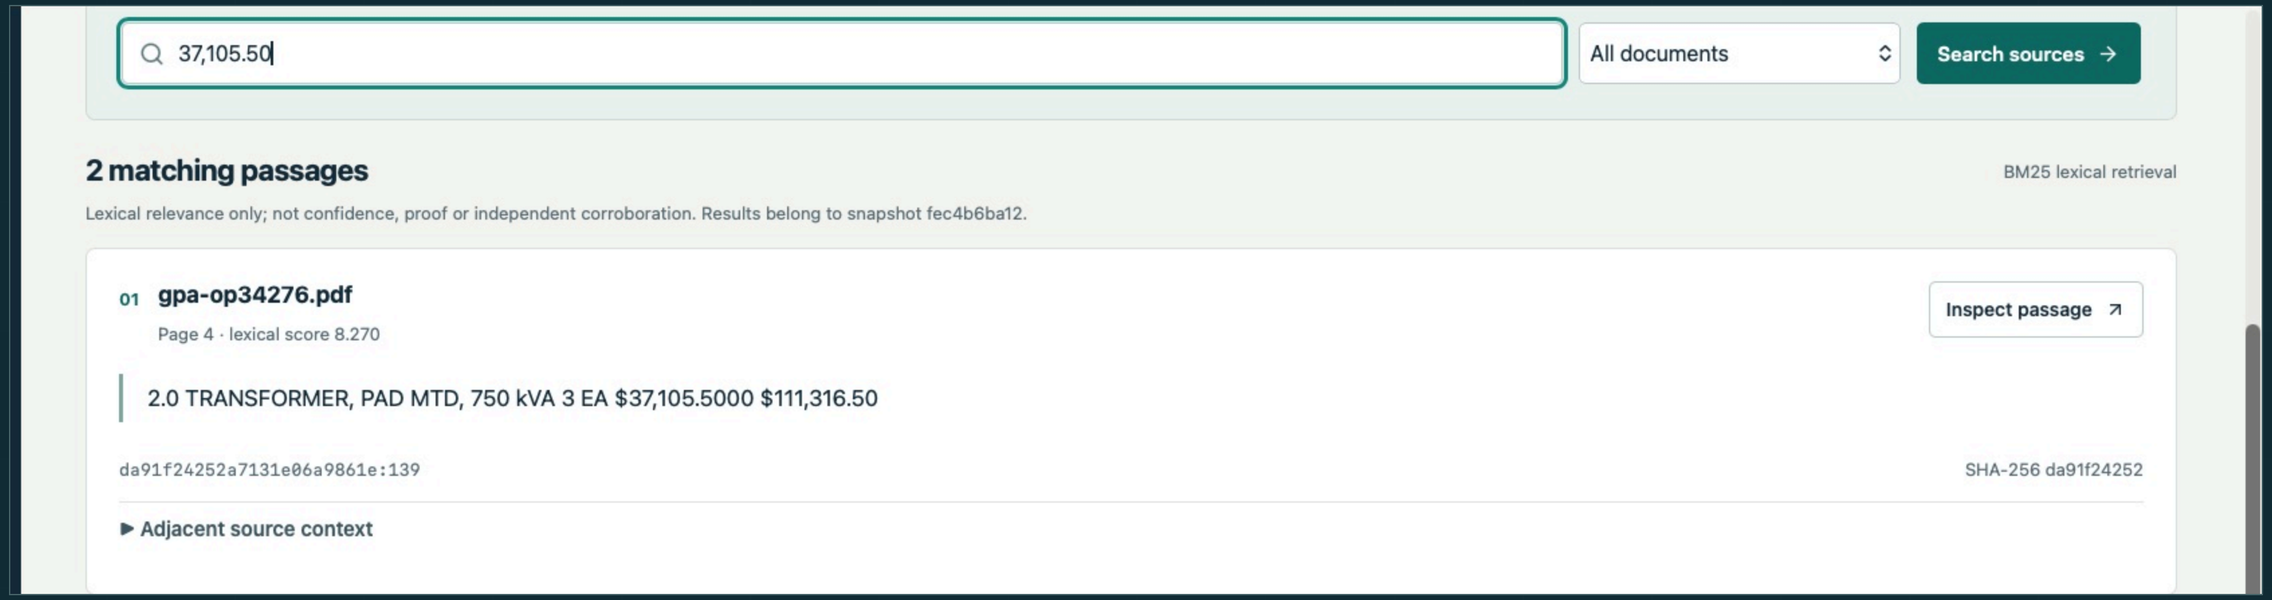

ASSISTANT CORRECTION / PER UNIT

$37,105.50

Purchase order PDF page 4.

Correction: Preserves raw output; qualified review remains pending.

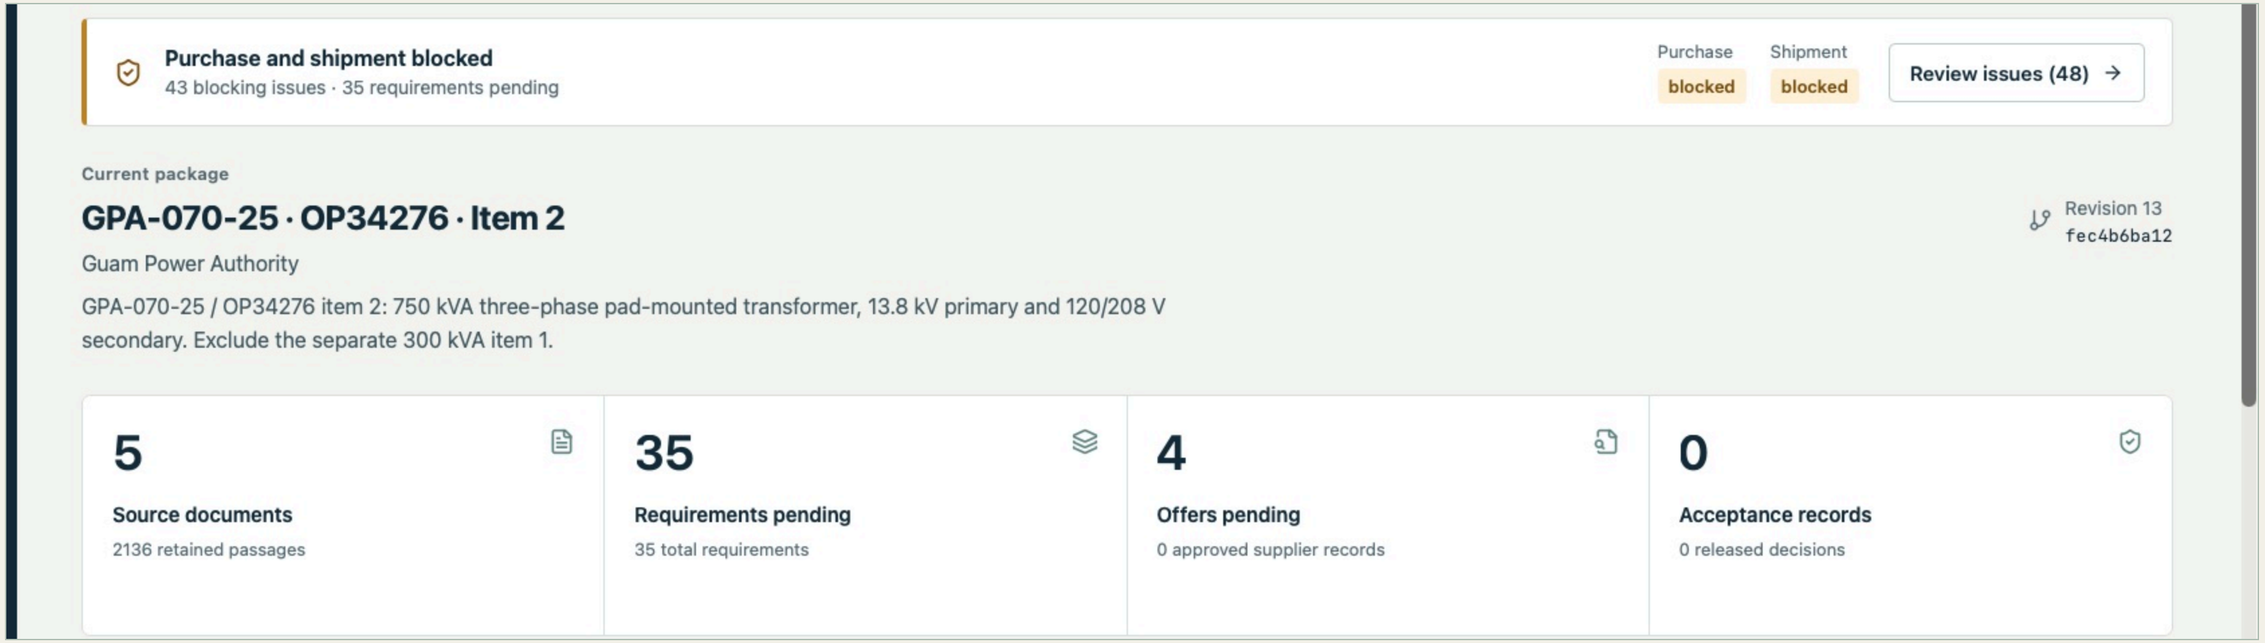

SOURCE SEARCH LOCATES THE ORIGINAL PURCHASE ORDER PRICE.

Exact retrieval: Ranks purchase order page 4 first for $37,105.50.

Source inspection: Opens the cited passage and original PDF page.

INCOMPLETE EVIDENCE BLOCKS PURCHASE AND SHIPMENT RELEASE.

Review state: 35 requirements and four offers remain pending.

FAT evidence: No acceptance record exists; shipment remains blocked.

TRACE ARCHIVES PRESERVE RECORDED GPU EXECUTION EVIDENCE.

RECORDED MODEL EXECUTION

Apertus v1.5 / 8B

Participant-controlled GPU host

PostgreSQL

Versioned package state

Temporal

Durable extraction workflow

Relay

Authenticated model access

Deployment: Uses operator-controlled infrastructure; Swiss residency remains unverified.

CURRENT ENDPOINT STATE

Stopped

Operator restored borrowed workloads after recording.

ROLE GATES REQUIRE APPROVALS FOR EACH PACKAGE REVISION.

Decision	Required authority	Recorded state
Purchase release	Engineer + Commercial	**Blocked**
Shipment release	Inspector + Commercial	**Blocked**

Revision change: Stales prior decisions and triggers full-package reassessment.

Initial identity: Restricts the engineer principal to the default project.

Acceptance: Leaves missing measurements and unit identity unknown.

RECORDED INFERENCE RUNS EXPOSE UNRESOLVED EXTRACTION LIMITS.

380 / 51

backend / frontend tests passed

5 / 64

completed runs / call traces

427 s

full 57-page tender

Software QA: Verifies behavior; model accuracy remains unmeasured.

Execution history: Retains 15 attempts: five completed and ten failed.

Recorded proposals: Include wrong bidder prices and out-of-scope requirements.

Full tender: Retains one failed audit and one capped window.
