A changed package requires a new decision.

THE MODEL CONFUSED TOTAL AND UNIT PRICE.

MODEL PROPOSAL / THREE-UNIT TOTAL

$111,316.50

Entered in the unit-price field.

CORRECTED / PER UNIT

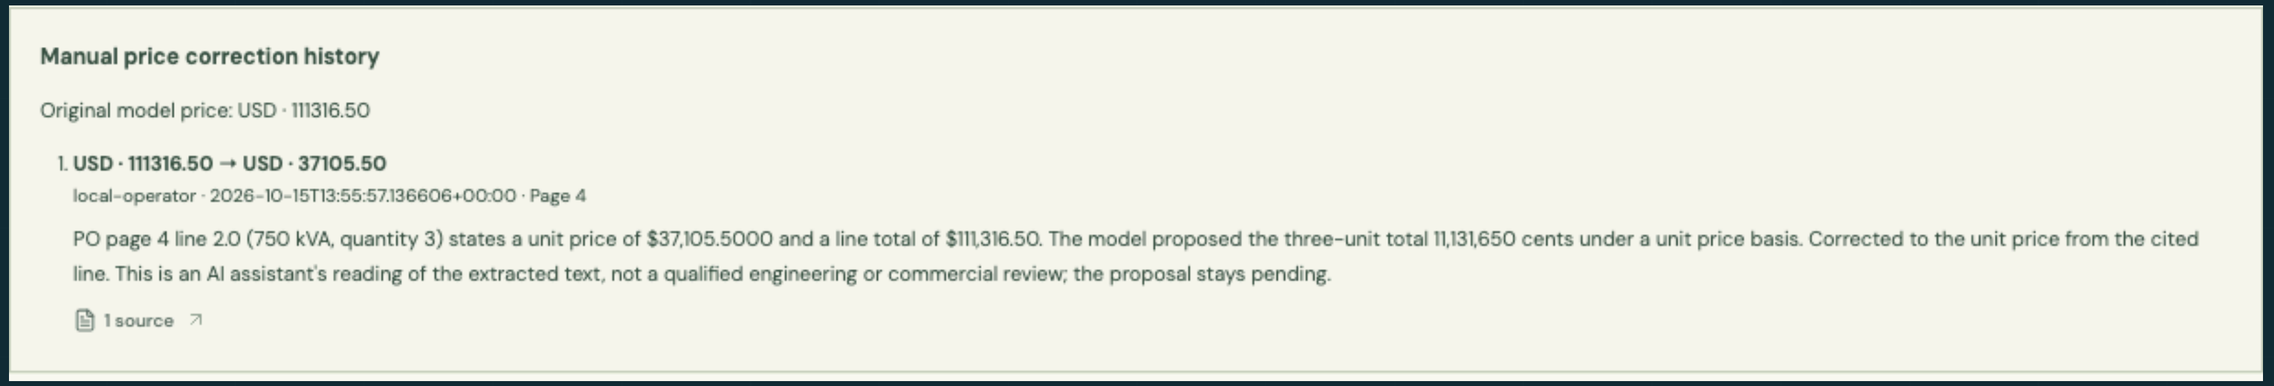

$37,105.50

Source: purchase order, page 4.

USD / 3 units

Correction recorded. Approval pending.

THE CORRECTION KEEPS ITS EVIDENCE.

Manual price correction history

Original model price: USD · 111316.50

1. **USD · 111316.50 → USD · 37105.50**
   local-operator · 2026-10-15T13:55:57.136606+00:00 · Page 4

   PO page 4 line 2.0 (750 kVA, quantity 3) states a unit price of $37,105.5000 and a line total of $111,316.50. The model proposed the three-unit total 11,131,650 cents under a unit price basis. Corrected to the unit price from the cited line. This is an AI assistant's reading of the extracted text, not a qualified engineering or commercial review; the proposal stays pending.

INCOMPLETE EVIDENCE BLOCKS RELEASE.

Extraction assurance requires review

5 extraction run(s) have unresolved coverage or validation conditions. Purchase and shipment release remain blocked. Reviewing individual rows does not resolve omitted obligations.

  - Audit failed: adversarial challenger (window 1). Apertus adversarial challenger failed or returned invalid structured output. Its output reached the max_tokens limit and was truncated. No decisions were approved.
  - Unresolved extraction finding: Pad Mounted Transformers: unit 'kVA' not shown in source spans s9, s32, s168, s228 (span s9)
  - Unresolved extraction finding: adversarial challenger returned invalid or truncated structured output; this window has no result from that role.
  - Unresolved extraction finding: Transformer kVA Size: 750 kVA shown in source_ids [s730,s731,s732,s733,s734,s735,s736] but not in source_id s675
  - Unresolved extraction finding: Secondary Voltage: 480Y/277V shown in source_ids [s731,s732] but not in source_id s675
  - Unresolved extraction finding: External Dry-film Thickness: 3.5 mil shown in source_ids [s717] but not in source_id s675
